Robinair VacuMaster A2, A2L & NH₃ Vacuum Pump

This pump comes with a sure-grip handle (a one-piece, moulded handle) which makes it easy to carry to site. The handle also stays cool to the touch during operation. The two-stage rotary vane design means the pump is powerful, quiet, has a high vacuum capacity. Gas ballast allows a precise amount of atmospheric air to be introduced into the pump, preventing condensation of moisture vapour - which helps to maintain the purity of the pump oil.

- For all common refrigerants
- For class A2L refrigerants
- For Ammonia (NH₃)
- Spark free electronic motor cut-out switch
- Spark free electronic On/Off switch
- 240V / 50Hz only
- 1 year warranty

Technical Information	RA-15501A-E-A2L
Capacity	5 CFM 128 l/min
Ultimate Vacuum Level	15 Micron (2 Pa)
Motor	500 Watt
Voltage	240V / 50Hz only
Gas Ballast	Yes
Oil Capacity	500ml
Dimensions (HxWxL)	340x150x270mm
Inlet Connection	Nickel Plated Steel 1/4"/3/8" SAE MFL
Weight	10.2kg
Number of Stages	2
