

## ■ INSTALLATION PROCESS

**STEP 1** - Position and mark ground for the required location of the FLEXI Lite Slab.

**STEP 2** - Prepare the ground.

**STEP 3** - Drill the slab for insertion of pipework and insert the drainage bung.

**STEP 4** - Mark the area below the slab for the pipework so that you can lay the drainage pipes prior to finalising the slab install.

**STEP 5** - Ensure that slab is level.

**STEP 6** - Measure the slab for the placement of the feet. This needs to match the pitch of the unit.

**STEP 7** - Place the feet in position, and drill 9mm holes through the feet 50mm from each end.

**STEP 8** - Attach all 4 base plates to the underside of the slab.

**STEP 9** - Place the feet on the threads.

**STEP 10** - Secure the feet with the nuts and washers, and position the spring nuts in the strut.

**STEP 11** - The Flexi Lite Slab install is complete and ready for the unit
