

## CONDENSATE COLLECTION TRAYS - METAL

### Metal trays

These metal trays have a convex profile and a recessed surface flush, drain hose adaptor, minimising the amount of standing water left in the tray. Supplied with fixing arms for mounting to all Pump House brackets. For improved corrosion resistance all metal now receives a 100% zinc plating, followed by a hard ED coating, before being finished with an external grade polyester powder coating to RAL 7032.

## FEATURES

- Concave profile ensures effective water drainage
- Recessed, surface-flush drain pipe adaptor minimises standing water in the tray
- Three sizes to suit many applications
- 1/2" BSP mail thread on drain outlet

## THE PACKAGE

- Tray
- 2 x hangers
- Fixings
- Installation instructions

NB: Sea salts are very corrosive and affect both ferrous and non-ferrous metals. Coastal installations are particularly at risk as they are frequently exposed to sea salt solutions followed by dry periods, where this wet/dry cycle produces a very corrosive environment. We strongly recommend that in such locations only our stainless steel brackets are installed.

## WEATHER PROTECTION PROCESS

**PROCESS ONE**  
Corrosion resistant raw material, often referred to as Zintec

**PROCESS TWO**  
Zinc phosphating process multi stage cleaning and dipping chemical zinc

**PROCESS THREE**  
ED coating process: electrophoretic deposition (aka ED or EPD) coating

**PROCESS FOUR**  
Epoxy polyester powder coating
